低黏度冷卻液應用，七道錐形濾芯，流量最高**385L/min**

NEW!
Qmax 385 l/min

DESCRIPTION

The new AutoFit® RF4-2 and RF4-3 aluminum cast are the most efficient filter from our compact RF4 series. With up to 7 filter elements and a filter area of up to 2500 cm², they offer a filter area more than 70 % larger than size 2 with only 4 filter elements and copes easily with flow rates of up to 385 l/min*.

The RF4 series was developed especially for use in coolant applications and is suitable for the separation of solid particles from low-viscosity fluids.

ADVANTAGES

Optimized performance

- Flow rates up to 385 l/min*
- Cost-efficiency - Price / Filter area
- Optionally extendable to 7 filter elements
